

**PORABLE COMPUTER HAVING DUAL CLOCK MODE**

**Abstract of the Disclosure**

The present invention provides a portable computer. In one aspect, the  
5 portable computer has a first power mode and a second power mode. The  
portable computer includes a memory bus and a control system coupled to the  
memory bus. The control system is configured to operate the memory bus at a  
first speed in the first power mode and a second speed different than a first speed  
in a second power mode.
